CAREER OBJECTIVE

Result-driven and creative professional with a solid grasp of modern web development tools and practices. I aim to build efficient, scalable, and user-friendly web applications that contribute to organizational success while continuously learning and growing as a developer.

SKILLS

Frontend Technologies: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Next.js(basic), JWT, Responsive Design, JSX, React Router, React Query .

Backend Technologies : Node.js, Express.js, MongoDB, Firebase Authentication, Mongoose.

Tools & Libraries : Node Git & GitHub, Vite.js, Axios, TanStack Query .

Interpersonal Skills: Communication, Time Management.

PROJECTS

1 . Tech Product Hunt

[Live Site](#) [Client GitHub](#) [Server GitHub](#)

A platform to discover and share tech products with seamless interaction and role-based access control.

- Supports multiple user roles (common user, moderator, admin) with distinct permissions and features.
- Users can post, review, and engage with tech products, ensuring an interactive experience.
- Moderators oversee content by approving or rejecting product listings to maintain platform quality.
- Admins manage user roles, monitor platform activities, and ensure smooth operation of system.

Used Technologies: React.js, Tailwindcss, Node.js, Express.js, MongoDB, Firebase, JWT etc.

2. WearHive - E-commerce Website

[Live Site](#) [Client GitHub](#) [Server GitHub](#)

An online store for men's, women's, and kids' fashion with role-based access and secure transactions.

- Customers can add products to the cart and wishlist, then place orders via Stripe payment.
- Sellers can add, update, and manage products while handling order fulfillment.
- Admins and Moderators manage users, review products and maintain platform quality control.
- AI-powered Chatbot offers instant support, answers queries, and helps users with orders.

Used Technologies: React.js, Tailwind, Node.js, Express.js, MongoDB, Firebase, JWT, AI Chatbot(Gemini).

3. AI-Powered Healthcare Appointment System(Team Project)

[Live Site](#) [GitHub](#)

AI-powered system for symptom analysis, medicine advice, doctor suggestion, and appointment booking.

- AI suggests doctors and medicines based on patient symptoms and selected district.
- **My Contribute:** Role-based dashboards for patients, doctors, and admins with real-time updates.
- **My Contribute:** Implemented intuitive appointment booking for patients to view and book slots easily.
- **My Contribute:** Role-based dashboards for patients, doctors, and admins with real-time updates.

Used Technologies: Next.js, Tailwind, NextAuth, Mongodb, Mongoose, AI Agent(Gemini), Framer Motion.

EDUCATION

Bachelor's in Management Cumilla
Government College, 2023 - Present

ACHIEVEMENTS

- **Complete Web Development** Course
